

Care Instructions

Protective Silk Coating

Special commercial grade resin coating is available upon request. It is highly recommended for pieces intended for public installations or areas of humidity or smoke. This coating does not change the appearance of the silk, but strengthens its texture.

Silk Care Instructions

For optimal maintenance vacuum the silk frequently (make sure the vacuum cleaner is at low suction and use a clean applicator) and avoid direct sunlight or smoke. To remove stains use upholstery foam cleaner (as these vary from country to country, testing the product on a hidden spot first is recommended). In case of heavier dirt use a moist sponge and make sure to move it along the crushed line of the silk

Please do not clean coated lamps with water.

Note that any good quality silk fibers weaken when exposed to sun and natural dyes may fade. Hence, avoid direct sunlight on the silk lights.

Molecules Lighting Care Instructions

The origami lampshades in this collection are made of the best quality origami paper which easily resists environmental influences and changes. We recommend regular dry dusting with a feather duster or a very soft (paint) brush in order to maintain the appearance and quality.

Tokonoma Lighting Care Instructions

The felt on these lamps is handmade of the finest merino wool and pure silk. We recommend regular dry dusting. The felt can also resist cleaning with water.

Upholstery Fabric Care Instructions

Regular cleaning is important in order to keep the upholstery looking its best and to prolong its life. Dust and dirt wear down the textile. We recommend frequent vacuum cleaning and removing of non-greasy stains using a moist cloth or sponge. Do not rub the upholstery fabric hard
